7.

HTML Links:- The target attribute

- By default, the linked page will be displayed in the current browser window.
- To change this, you must specify another target for the link.
- The "target" attribute specifies where to open the linked document.
- The "target" attribute can have one of the following values:
 - * _self :- Default. Opens the document in the same window/tab as it was clicked.
 - * _blank :- Opens the document in a new window or tab.

7. The image Tag ()
